ETL Project: Group 12

- **Group 12 Members:**
  - Krishna, Corey, Lupita

- **Project Repo**: https://github.com/kpp1106/ETL_Project

- **Data Source:**
  - https://finance.yahoo.com/
  - https://rapidapi.com/natkapral/api/currency-converter5

- **What useful investigation could be done with the final database?**
  - We are providing information on the top 3 stock market listings and providing world wide currency information (main: USD)

- **Whether the final database will be relational or non-relational. Why?**
  - The database will be non-relational since there is no relationship between the web-scraped data and RapidAPI data on currencies.

- Corey: Focus on building the Flask application.
- Krishna:ProgresSQL
- Lupita: Jupyter/Python
